DESIGNED &
MADE IN MELBOURNE

A large circular image showing the interior of a warehouse. In the foreground, a black Shelfbot autonomous mobile robot (AMR) is visible, equipped with various sensors and a camera. The robot is positioned on a metal floor. In the background, there are several long, narrow metal shelving units or conveyor belts extending into the distance. A large, industrial-style pendant light hangs from the ceiling. The overall scene is brightly lit, and the background wall is made of white concrete blocks.

SPACE OPTIMISATION

Unparalleled Space Optimisation

Each Shelfbot accommodates up to 1,000 100L bins, offering flexible, narrow-aisle design up to 7m high and 20m long. This translates to an impressive 100 m³ cubic metres of bin storage in a compact 20m x 7m x 2.6m space, dramatically increasing your warehouse capacity.

Seamless Integration and Operation

Shelfbot integrates directly with your WMS or e-commerce platform, ensuring smooth product and order flow. Our user-friendly touchscreen app guides operators through picking and replenishment processes using barcode scanners, streamlining your entire warehouse operation.
